

Honeywell Cybersecurity

Our institution has established a Center of Excellence (CoE) in Cybersecurity in collaboration with Honeywell, with the vision of preparing students to meet the growing challenges in the digital world. The CoE serves as a hub for training, research, and industry collaboration in the field of cybersecurity.

Objectives:

Provide hands-on training on cutting-edge cybersecurity tools and technologies.

Bridge the gap between academia and industry needs.

Encourage student projects, certifications, and internships in cybersecurity.

Conduct seminars, workshops, and expert lectures with Honeywell professionals.

Promote research and innovation in data security, ethical hacking, and network defense.

Outcomes:

Students gain global standard skills in cybersecurity.

Enhanced employability through industry-recognized certifications.

Exposure to real-world problems and professional solutions.

Build a secure digital ecosystem with industry partnerships.
