Power BI & Azure AI

Our college has established a Center of Excellence (CoE) in collaboration with Microsoft to equip students with advanced skills in Data Analytics, Business Intelligence, and Artificial Intelligence. This CoE focuses on training students and faculty in Power BI, Azure AI, and cloud-based technologies, preparing them for the demands of the global IT industry.

Objectives:

Provide hands-on training in Microsoft Power BI for data visualization and decision-making.

Enable students to explore Azure AI services including machine learning, natural language processing, and computer vision.

Bridge the gap between academic learning and industry requirements.

Encourage projects, internships, and certifications under Microsoft's ecosystem.

Organize seminars, workshops, and expert sessions with industry professionals.

Outcomes:

Students gain industry-recognized skills and certifications from Microsoft.

Improved employability in data analytics, AI, and cloud computing domains.

Exposure to real-time projects and practical problem-solving.

Development of a future-ready workforce with global competencies.
